### **Abstract**

**Subject/topic.** The article is devoted to the consideration of the operation of the laws of money in the conditions of sanctions and the conduct of hostilities. The subject of the study is the analysis of compliance with market approaches in the context of strengthening globalization processes in the world economy. **Goals/objectives.** The purpose of the work is to substantiate measures to overcome negative phenomena in the economy based on the use of the laws of money and market conditions. **Methodology.** The methodological basis of the article was formed by general scientific methods - synthesis, deduction. In the process of studying the problems of the economy, event, logical, and also expert analysis was applied using statistical data. **Results.** The article substantiates that low economic growth results from the fact that in the financial and banking sector they trust more the recommendations of international institutions than the theoretical justifications of domestic scientists. **Conclusions/significance.** The novelty of the study lies in the use of knowledge of the operation of all the laws of monetary circulation in the conditions of severe sanctions and the conduct of hostilities and how to avoid negative consequences or weaken them. **Application.** The results of the study can be of practical use in making managerial decisions by government officials on the implementation of the economic policy of the state in order to overcome the negative impact of sanctions, as well as used by university teachers when conducting classes with students.

**Keywords:** *laws of money, theory of money, principles of money, war, sanctions.*
